

## Questions to help clarify the applications

### Content:

1. How is the relevance of the study project substantiated?
2. How is the topic related to the Knowledge Hub?
3. How does the student's work contribute to the Knowledge Hub? How do the students in the Circle U.-Team interact with the overarching theme of the Hub?

### Participation and Organisation:

4. Is the description of the target group plausible and well-founded?
5. Is there a coherent and realistic semester plan that fits the didactic format?
6. Are the students actively involved in the process during the Circle U.-Team?
7. Are the students involved in the presentation of the results of the study project?

### Didactic Concept:

8. Does the project have a didactic focus? (For example, on social engagement or science communication, or...)
9. How is the didactic format explained?
10. How is the competence development of the students described?

### Person:

11. How much experience does the applicant have with teaching?
12. How does the applicant see their role in the course/study project? Is it recognisable how the applicant wants to shape the collaboration with a student study team in student-centred learning?
13. Does the application indicate the applicant's personal interest and motivation? Is it evident that the applicant is interested in working with students and wants them to actively participate in their project?

### Form:

14. Does the application address all important points and is the structure easy to follow?
15. Is the application written for an interdisciplinary audience?
